

Agenda Item No: 5
Report To: Audit Committee
Date of Meeting: 19 March 2019
Report Title: Presentation of Financial Statements
Report Author & Job Title: Maria Hadfield
Senior Accountant
Portfolio Holder: Cllr. Shorter
Portfolio Holder for: Finance & ICT

Summary: The Council is required to follow statutory guidance for the publication of its accounts. Each year, this guidance is reviewed and updated. This report will look at the impact of these updates on the Council's accounts for 2018/19. In addition, the report reviews on the lessons learnt from the accounts process in 2017/18.

The Council has completed a review of its accounting policies that will be used for the publication of the statement of accounts; they are presented in Appendix A.

The accounts will be prepared on a 'going concern' basis.

Key Decision: No

Significantly Affected Wards: None specifically

Recommendations: **The Committee is recommended to:-**

- I. Note the report**
- II. Approve the accounting policies for the 2018/19 accounts in Appendix A**

Financial Implications: None

Legal Implications: The Council is required to produce an annual set of accounts

Equalities Impact Assessment: Not Required

Other Material Implications: None

Exempt from Publication: **NO**

Contact: Maria.hadfield@ashford.gov.uk – Tel: (01233) 330545

Report Title: Presentation of Financial Statements

1. This report is to update members on the progress of the production of the Statement of Accounts 2018/19 (the Statement) and how changes are to be managed and implemented.
2. Members are asked to note the report and approve the 2018/19 Accounting Policies.

Introduction and Background

3. The Council is required to produce an annual statement of accounts for the financial year ending the 31 March by the end of May. These are then audited by the Council's external auditor and an opinion issued by the end of July.
4. The timetable for early closing is now embedded within the Accountancy team and the annual statement of accounts for the financial year ending the 31 March 2019 will therefore be produced by the end of May. The Accounts will then be audited by Grant Thornton during early June with an opinion issued by the end of July.
5. This year there are a few changes to the code (Code of Practice on Local Authorities Accounting) for incorporation, if the impact is significant, into the final accounts for 2018/19 and these are detailed in the Accounting Changes/Updates for 2018/19 section below.

2017/18 Statement of Accounts Audit

6. The 2017/18 Statement of Accounts was audited by Grant Thornton, appointed by the National Audit Office.
7. Overall officers and the external auditors were happy with both the audit process and the working relationship during the audit. Regular meetings throughout the audit were held so any finding could be fed back and worked through together. These meetings will be maintained for the 2018/19 closing process to ensure the process runs as efficiently this year.
8. The Grant Thornton audit team this year, retains the Audit Manager Trevor Greenlee and has a new Principal Auditor, Simon Holloway. This team will be headed up by the Council's new Audit Lead; Darren Wells (Director).
9. Principal auditor Simon Holloway has already been in the office conducting pre-audit testing and officers are confident that the transition will run smoothly.
10. Internally the accounts close-down process will be co-ordinated by Senior Accountant, Maria Hadfield, with the Head of Finance overseeing the process.
11. Last year the accountancy team achieved the faster closedown target and with accounts signed off by 31 Jul 2018. This date is now the statutory

deadline for all Local Authorities and the team have reviewed the timetable and work is well underway to achieve the deadline this year.

12. The target is to have a completed final draft by 24 May, key deadlines below:
 - a. Service Accounts and Collection Fund to be closed by 16 April
 - b. Balance Sheet Codes to be closed by 10 May
 - c. Draft Statement by 18 May

Going Concern Principle

13. The Council has set a budget for 2019/20 and has a Medium Term Financial Plan that demonstrates that the Council is a 'going concern' and will operate for the foreseeable future. As such the accounts will be prepared on this basis.

Accounting Changes/Updates for 2018/19

14. **IFRS 9 *Financial Instruments*** is the new accounting standard for investments, borrowing, receivables and payables, which applies to local authorities from the 2018/19 financial year onwards.
15. The significant change to the 2018/19 accounts will be the need to make recognition for expected credit losses on financial assets. This will involve reviewing the risk characteristics and other reasonable and supportable information around investments and making a judgement over the likelihood of a need for an impairment over the next 12 months, and where risk has significantly increased, or is high then over the lifetime of the investment.
16. Where any potential risk of impairment is determined, then a charge will be made in year to the provision of services accordingly.
17. Loss allowances will not need to be recognised where the counterparty for the financial asset is central government or a local authority where relevant statutory provisions prevent default.
18. A review is ongoing to assess the impact of this accounting change and the impact on the accounts, it is not expected to be significant.
19. The code requires Authorities to account for revenue recognition in accordance with **IFRS 15 *Revenue from Contracts with Customers*** (service recipients). This amendment requires Authorities to recognise revenue to present the transfer of promised goods and services to service recipients as an amount which the authority expects to receive in exchange for these goods and services.
20. Authorities have to consider the materiality of these income streams, how useful the information is to the users of the accounts and how this information will effect decisions made by users.

21. A review is ongoing to assess the impact of this accounting change and the impact on the accounts, it is not expected to be material.
22. **IAS7 Statement of Cash Flows** new disclosure note requirement showing the reconciliation between opening and closing liabilities arising from financing activities, including both cash and non-cash changes.

Looking ahead Accounting Changes

23. Looking beyond the next set of accounts there are further changes to the accounting standards that manage the accounting for Financial Instruments and Leases.
24. Fundamentally the lease change will see all leases recognised on the balance sheet where the Council is the lessee.

Next Steps in Process

25. There will be a Members training session and the presentation of the draft statement on 18 June, where any questions or issues from Members can be discussed with officers.
26. In July the Statement of Accounts will be submitted for signing to the Audit Committee and the external auditors audit findings will be presented.

Conclusion

27. Members are asked to note the changes to the final accounts process and approve the Accounting Policies in **Appendix A**.

Portfolio Holder's Views

28. To be given at the meeting

Accounting Policies

General Principles

The Statement of Accounts summarises the Authorities transactions for the 2018/19 financial year and its position at the year ending 31 March 2019. The Authority is required to prepare an annual Statement of Accounts by the Accounts and Audit Regulations 2015, which require being prepared in accordance with proper accounting practices. These practices primarily comprise the 'Code of Practice on Local Authority Accounting in the United Kingdom 2018/19' (the Code), supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

1. Accounting Concepts and Conventions

The Going Concern basis has been selected for the preparation of these accounts based on the assumption that the Council will operate for the foreseeable future.

Qualitative characteristics are the attributes that make the information provided within this Statement of Accounts useful to users. The International Accounting Standards Board (IASB) Framework, sets out the two fundamental qualitative characteristics and four enhancing qualitative characteristics of financial statements, which have been adopted by the Code:

- Fundamental
 - Relevance
 - faithful representation
- Enhancing
 - comparability
 - verifiability
 - timeliness
 - understandability

The Code also includes consideration of materiality as a qualitative characteristic, and the Framework considers it as part of the fundamental characteristic of relevance.

2. Accruals of Income and Expenditure

With the exception of the Cash Flow Statement, including its notes, and the Collection Fund, the Statement of Accounts is presented on an accruals basis.

The accruals basis of accounting requires the non-cash effect of transactions to be reflected in the Statement of Accounts for the year in which those effects are experienced, and not in the year in which the cash is actually received or paid. In particular: fees, charges and rents due from customers are accounted for as income at the date the Council provides the relevant goods or services; interest payable on borrowings and receivable on investments is accounted for on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.

Where income and expenditure have been recognised, but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet, where it is doubtful that debts will be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected. There is a de minimis limit for manual accruals (not automatic accruals) of £5,000 to aid faster closing, transactions below this limit are not accrued for as they are deemed not material to the understanding of these accounts.

3. **Estimation Techniques**

Estimation techniques are the methods adopted by the Council to arrive at estimated monetary amounts, corresponding to the measurement bases selected for assets, liabilities, gains, losses and changes in reserves. Details of where these are used are contained in the relevant Note to the Accounts. Where a change in an estimation technique is material, an explanation is provided of the change and its effect on the results for the current period.

4. **Costs of Internal Support Services**

All costs of management and administration are fully allocated to services, including Corporate Democratic Core. The basis of allocation used for the main costs of management and administration are outlined below:

Cost	Basis of Allocation
Accounting and other services	Budgeted time spent by staff, as predicted by budget managers
Legal services	Actual time spent by staff, as recorded on time recording systems
Administrative Buildings	Area occupied
IT support of corporate financial systems	Actual direct costs (hardware costs etc.) plus cost of estimated staff resources
Network / PC support	Per capita
Executive Support, Call Centre, Customer Contact Centre and Printing	Actual use, as recorded by monitoring systems
Internal Audit	Per audit plan

Payroll and Personnel Costs	Per capita
Debtors and Creditors	Per transaction

5. Council Tax and National Non-Domestic Rates

Revenue relating to council tax and business rates is measured at the full amount receivable (net of any impairment losses) as they are non-contractual, non-exchange transactions. Revenue is recognised when it is probable that the economic benefits of the transaction will flow to the Council and the amount of revenue can be measured reliably.

The council tax and business rates income included in the Comprehensive Income and Expenditure Statement is the accrued income for the year, which consists of:

- The Council's council tax precept and business rate share from the Collection Fund i.e. the amount billed for the year; and
- The Council's share of the actual council tax and business rates surplus or deficit on the fund at the preceding year end that has not been distributed or recovered in the current year.

The latter is not required by regulation to be credited to the General Fund and so is taken to the Collection Fund Adjustment Account and included as a reconciling item in the Movement in Reserves on the General Fund balance.

The Council, as billing authority, recognises the creditor in its balance sheet for cash collected from taxpayers and businesses on behalf of major preceptors but not yet paid to them, or a debtor for cash paid to major preceptors.

6. Charges to Revenue

Service and Support Service Accounts are debited with amounts to record the cost of holding non-current assets used in the provision of services.

These amounts include the annual provision for depreciation, certain revaluation gains/losses and impairment losses and the amortisation of intangible assets. The amounts are subsequently reversed in the Movement in Reserves Statement to the Capital Adjustment Account so that they do not impact on the amounts required from local taxation.

Capital charges made to the Housing Revenue Account are the amounts as determined by proper accounting practices.

External interest payable is debited in the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement and amounts set aside from revenue for the repayment of external loans are charged to the General Fund Balance in the Movement in Reserves Statement.

7. Revenue Expenditure Funded from Capital Under Statute

Legislation allows some expenditure to be classified as capital for funding purposes when it does not result in the expenditure being carried on the Balance Sheet as a Property Plant and Equipment. The purpose of this is to enable it to be funded from capital resources rather than being charged to the General Fund and have a direct impact upon Council Tax. These items are generally grants and expenditure on property not owned by the Council.

Such expenditure is charged to Cost of Services in the Comprehensive Income and Expenditure Statement but subsequently reversed in the Movement in Reserves Statement to the Capital Adjustment Account.

8. **Government Grants and Contributions**

Grants received are credited to the Comprehensive Income and Expenditure Statement when the income is recognised once conditions have been met. Revenue Grants specific to a particular service will be shown against the service expenditure line. General Revenue Grants, in the form of Revenue Support Grant and the contribution from the National Non-Domestic Rate Pool, and Capital Grants are credited and disclosed separately in the Taxation and Non-specific Grant Income line in the Comprehensive Income and Expenditure Statement.

Capital Grants and Capital Contributions will subsequently be transferred through the Movement in Reserves Statement to the Capital Adjustment Account or the Grants Unapplied Account, if expenditure has not been incurred.

If conditions have not been met, grants will be held as a creditor (Grants received in advance) on the Balance Sheet until conditions are met or grants are repaid.

9. **VAT**

VAT is accounted for separately and is not included in the Comprehensive Income and Expenditure Statement, whether of a capital or revenue nature. Input VAT, which is not recoverable from HM Revenue and Customs, will be charged to Service Revenue Accounts, or added to capital expenditure as appropriate. The Council's partial exemption status is reviewed on an annual basis.

10. **Heritage Assets**

Heritage assets are carried at valuation (e.g. insurance valuation) rather than fair value, reflecting the fact that exchanges of heritage assets are uncommon. Valuations are determined by the insurance valuation, or where not available the historical cost. Although there are no prescribed minimum periods for review, the assets will be reviewed in line with the insurance policy and material changes will be incorporated into the accounts. A de-minimis level has been set at £10,000 for heritage assets based on the method of valuation above.

11. **Assets Held for Sale (Current Assets)**

These assets have been declared surplus to the Council's operational requirements, are being actively marketed for disposal and have an estimated sale date within twelve months of the balance sheet date. They are reported on the Balance Sheet date at the lower of the carrying amount or the fair value (market value) of the asset less the costs to sell the asset. Assets held for sale are not subject to depreciation. Potential 'Right-to-buy' sales are not accounted for until the date of sale as they are not actively marketed in any conventional way.

12. **Intangible Assets**

Expenditure on assets that do not have physical substance but are identifiable and controlled by the Council (e.g. software licences) is capitalised when it will benefit the Council for more than one financial year.

An intangible asset is initially measured at cost but will be revalued where the fair value of the asset differs significantly from its carrying value. The depreciable amount is amortised over its useful economic life to the relevant service line in the Comprehensive Income and Expenditure Statement but subsequently reversed through the Movement in Reserves Statement to the Capital Adjustment Account.

13. **Investment Assets**

These assets are held solely to earn rentals and/or capital appreciation. The property cannot be used for any other purpose to be classed as an investment asset.

They are held initially at cost and subsequently at fair value being the price that would be received to sell such an asset.

Properties are not depreciated but are revalued annually according to market conditions at the year-end.

14. **Property, plant and equipment**

14.1. **Recognition**

All expenditure on the acquisition, creation, or enhancement of these assets is capitalised on an accruals basis. These assets are depreciated on a straight line basis.

14.2. **Recognition Definition**

Property, plant and equipment are tangible assets (i.e. assets with physical substance) that are held for use in the production or supply of goods and services, for rental to others, or for administrative purposes, and expected to be used during more than one period.

The category is split into seven sub categories.

- Council Dwellings;
- Other Land and Buildings;
- Vehicles, Plant, Furniture and Equipment;
- Infrastructure Assets;
- Community Assets;
- Surplus Assets;
- Assets Under Construction.

The Accounting policy for each type of asset is detailed below:

14.3. **Council dwellings**

These assets are held on the balance sheet at fair value but discounted to allow for the Existing Use Value for Social Housing (EUV-SH).

An annual valuation is carried out by a qualified surveyor in accordance with the latest guidance issued by the Royal Institute of Chartered Surveyors (RICS) as at 31 March. Material changes will be reflected in the accounts if they arise after the valuation.

14.4. **Other Land and Buildings**

These assets are held on the balance sheet initially at cost however are revalued and updated with a desktop revaluation annually. All property and land will be fully valued at least once within the 5 year cycle.

IFRS requires the consideration of componentisation for material items of property, plant and equipment, where they are of a material financial nature or have significantly differing life expectancies. The Council has set a minimum asset value of £1,000,000 and a component size of at least 10% of the value.

14.5. Vehicles, Plant, Furniture and Equipment

These assets are recognised in the balance sheet at cost and are subject to straight-line depreciation over the expected life of the asset.

14.6. Infrastructure Assets

These assets are recognised in the Balance Sheet at cost and are subject to straight-line depreciation over the expected life of the asset.

14.7. Community Assets

These are defined as assets that the local authority intends to hold in perpetuity, that have no determinable useful life and that may have restrictions on their disposal. Examples of community assets are parks and allotments. These assets are held on the Balance Sheet at historic cost and are not subject to revaluation or depreciation.

14.8. Assets under Construction

This covers assets currently not yet ready for operational purposes. The Council does not depreciate nor revalue assets under construction. These asset are held at cost on the balance sheet.

14.9. Surplus Assets

These assets are not being used to deliver services and are held at fair value which is the price that would be receivable if sold.

14.10. Valuations

Increases in valuations are matched by credits to the Revaluation Reserve to recognise revaluation gains. However, where the increased valuation follows a previous reduction in the carrying value below its historic cost, gains would be credited to the service expenditure in the Comprehensive Income and Expenditure Statement to reverse the loss previously charged to a service.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

On revaluation, accumulated depreciation is written out.

14.11. Depreciation

Depreciation on assets with a finite useful life, in line with International Accounting Standard (IAS) 16, is calculated on a straight-line basis according to the following policy:

- All assets with a finite useful life are depreciated on a straight-line basis over the asset life. The life of buildings is reviewed as part of the asset revaluation. The life of vehicles, plant and equipment is generally taken

to be five years, unless evidence exists to support a longer or shorter life.

- Newly acquired assets are depreciated in year one, assets in the course of construction are not depreciated until they are ready for use.
- In accordance with recognised accounting practice, land owned by this Council is not depreciated.

14.12. Impairment of Non-current Assets

A review for impairment of a non-current assets, whether carried at historical cost or valuation, is carried out at year-end to ascertain whether events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Examples of events and changes in circumstances that indicate impairment may have been incurred include:

- a significant decline in the asset's fair value during the period;
- evidence of obsolescence or physical damage to the asset;
- a significant adverse change in the statutory or other regulatory environment in which the authority operates;
- a commitment by the authority to undertake a significant reorganisation.

In the event that an impairment is identified, the value will either be written off to the Revaluation Reserve where sufficient reserve levels for that asset exist, or written off to Service Expenditure through the Comprehensive Income and Expenditure Statement where the carrying value falls below the historic value of the asset. Any impairment at the Balance Sheet date is shown in the notes to the core financial statements, along with the name, designation and qualifications of the officer making the impairment.

If the impairment is identified on an investment property, the value is written out to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement.

14.13. Gains or Losses on Disposal of Property Plant and Equipment

When an asset is disposed of or de-commissioned, the carrying value of the asset and any receipts from the sale, together with the costs of disposal, are shown on the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement which, therefore, bears a net gain or loss on disposal.

Where the receipt is in excess of £10,000, it is appropriated to the Capital Receipts Reserve, via the Movement in Reserves Statement, where it can be used for any approved capital purpose, e.g. for new capital investment. The carrying value of the disposed asset is appropriated to the Capital Adjustment Account from the Movement on Reserves Statement. Costs of disposal are

accounted for within the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement.

15. **Leases**

A lease is an agreement whereby the lessor conveys to the lessee, in return for a payment or series of payments, the right to use an asset for an agreed period.

A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred. An operating lease is a lease other than a finance lease. A definition of a lease includes hire purchase arrangements.

15.1. **Finance Leases**

As lessee, the Council shall recognise finance leases as assets and liabilities at amounts equal to the fair value of the property or, if lower, the present value of the minimum lease payments.

Minimum lease payments are apportioned between the finance charge (interest) and the reduction of the outstanding liability. The finance charge is calculated to produce a constant periodic rate of interest on the remaining balance of the liability.

The Council recognises an asset under a finance lease in the Balance Sheet at an amount equal to the net investment of the lease.

Assets recognised under a finance lease are depreciated; the depreciation policy for leased assets is consistent with the policy for other property, plant and equipment. Where it is not certain that ownership of the asset will transfer at the end of the lease, the asset is depreciated over the shorter of the lease term and its useful economic life. After initial recognition, assets recognised under a finance lease are subject to accounting policies in the same way as any other asset.

As lessor, the Council derecognises the asset and show this as a long term debtor. Lease rentals receivable are apportioned between a charge for the acquisition of capital (applied to write down the lease debtor) and finance income – which is credited to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement. The Code required this income to be treated as a capital receipt and therefore, it is reversed out via the Movement in Reserves Statement to the Capital Receipts Reserve. For finance leases that existed at 31st March 2010, regulations allow these capital receipts to remain credited to the Comprehensive Income and Expenditure Statement.

15.2. **Operating Leases**

Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the benefits received by the Council.

16. **Current Assets and Liabilities**

16.1. **Short term Debtors and Creditors**

With exception set out above (policy no 2), the Revenue and Capital accounts of the Council are maintained on an accruals basis in accordance with the Code and other relevant IASs. That is, sums due to or from the Council during the year are included, whether or not the cash has actually been received or paid in the year.

16.2. **Impairment Allowance for Bad and Doubtful Debts**

The figure shown in the Statement of Accounts for Debtors is adjusted for bad debts. This amount is to provide for debts that are unlikely to be collected in future years. The percentage used to reduce the Debtors figure is based on historical evidence of collection and management judgements.

17. **Contingent Assets and Contingent Liabilities**

Contingent assets are not recognised in the Statement of Accounts. They are disclosed by way of notes if the inflow of a receipt or economic benefit is probable. Such disclosures indicate the nature of the contingent asset and an estimate of its financial effect.

Contingent liabilities are not recognised in the accounting statements. They are disclosed by way of notes if there is a possible obligation which may require a payment or a transfer of economic benefits. For each class of contingent liability, the nature of the liability is disclosed together with a brief description, an estimate of its financial effect, an indication of the uncertainties relating to the amount or timing of any outflow and the possibility of any reimbursement.

18. **Short term and long term Provisions**

The Council sets aside provisions for specific liabilities or losses which are likely or certain to be incurred, but the amounts or the dates on which they will arise are uncertain. The value of the provision must be the best estimate of the likely liability or loss. When utilised, the payment is charged to Provisions and not to Service Expenditure.

19. **Reserves**

The Council holds Usable and Unusable Reserves. Usable Reserves give the Council discretion to meet expenditure without having a direct impact on Council Tax. In contrast, Unusable Reserves do not give the Council such discretion and are kept to manage the accounting processes for non-current assets, financial instruments and employee benefits.

Usable Reserves are created when the Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. These reserves are created by appropriating amounts out of the General Fund Balance in the Movement in Reserves Statement. No expenditure is charged directly to a reserve but is charged to the service revenue account within the Comprehensive Income and Expenditure Statement; this is then offset by a reserve appropriation within the Movement in Reserves Statement. The exception is amounts required for the repayment of external loans and for financing capital expenditure from revenue sources. Where this applies,

amounts are appropriated from the General Fund Balance in the Movement in Reserves Statement.

The General Fund Balance acts as a working contingency to meet unforeseen and unforeseeable costs including those relating to emergencies. Earmarked reserves, such as the repairs and renewals reserve, are for specific purposes. The Capital Receipts Reserve can only be used for certain statutory purposes such as financing capital expenditure.

The Major Repairs Reserve is required by statutory provision to be set up in relation to the Housing Revenue Account.

20. **Employee Benefits**

Three categories of employee benefits exist, under IAS 19 and IPSAS 25 Employee Benefits, as detailed below.

20.1. **Benefits payable during employment**

- Short-term employee benefits arise during a financial year or are those due to be settled within 12 months of the year-end. They include wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees, and are recognised as an expense for services in the year employees render service to the Council.
- Benefits earned by current employees but payable twelve months or more after the end of the reporting period such as, long-service leave or jubilee payments and long-term disability benefits.

Where considered of a material nature these are accrued.

20.2. Termination benefits including Exit Packages

This covers costs that are payable as a result of either an employer's decision to terminate an employee's employment before the normal retirement date; or an employee's decision to accept voluntary redundancy in exchange for those benefits. These are often lump-sum payments, but also include enhancement of retirement benefits, and salary until the end of a specified notice period if the employee renders no further service that provides economic benefits to the entity.

In the event of notice of termination being served on an employee, the costs of redundancy are accrued to the year that the notice is served, but other costs will be charged to the year they are incurred. These costs are charged on an accruals basis to the appropriate service or, where applicable, to the Non Distributed Costs line in the Comprehensive Income and Expenditure Statement where the Council is committed to the termination of employment.

20.3. Post-employment benefits

As part of the terms and conditions of employment of its employees, the Council offers retirement benefits. Although these benefits will not actually be payable until employees retire, the Code requires the Council to account for this benefit at the time that employees earn their future entitlement. The amount charged to the Comprehensive Income and Expenditure Statement for employee's pensions is in accordance with IAS19 Retirement Benefits, subject to the interpretations set out in the Code. This is accounted for in the following ways:

- Pension liabilities, attributable to the Council, are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees based on assumptions about mortality rates, employee turnover rates and projected earnings for current employees etc.
- Liabilities are discounted to their value at current prices, using a discount rate based on the indicative rate of return.
- The assets of the pension fund attributable to the Council are included on the Balance Sheet at their fair value:
 - Quoted securities – current bid price;
 - Unquoted securities – professional estimate;
 - Unitised securities – current bid price;
 - Property – market value.
- The change in net pensions liability is analysed into five components:
 - Current service cost – the increase in liabilities as result of years of service earned this year – allocated in the Comprehensive Income and Expenditure Statement to the service where employees worked.

- Past service cost – the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years – debited to the net cost of services in the Comprehensive Income and Expenditure Statement as part of the Non Distributable Costs.
- Net interest on the net defined benefit liability (asset) – the change during the period in the net liability (asset) that arises from the passage of time. This is debited/ (credited) to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement.
- Gains/losses on settlements and curtailments – the result of actions to relieve the Council of liabilities or actions that reduce the expected future service or actuarial benefits of employees - debited to the net cost of services in the Comprehensive Income and Expenditure Statement as part of the Non Distributable Costs.
- Actuarial Gains and Losses – changes in the net pension liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the assumptions have been updated - debited to the Comprehensive Income and Expenditure Statement.

Under IAS 19, the Council recognises, as an asset or liability, the surplus/deficit in pension costs calculated in accordance with the standard. This surplus/deficit is the excess/shortfall of the value of assets when compared to the present value of the pension liabilities. Where the contributions paid into the Pension Fund do not match the change in the Council's recognised liability for the year, the recognised cost of pensions will not match the amount required to be raised in taxation. Any such mismatch is to be dealt with by an equivalent appropriation to or from the Pension Reserve together with any actuarial gains/losses. The difference between the recognised net pension liability and the amounts attributed to this Council in Kent County Pension Fund are shown in the Balance Sheet as Pensions Liability and this is offset by the Pensions Reserve (an adverse balance).

The Local Government Pension Scheme, applicable to this Council, is administered locally by Kent County Council – this is a funded defined benefit final salary scheme, meaning that the Council and employees pay contributions into a fund, calculated at a level intended to balance the pension's liabilities with investment assets over the average future working life of its employees.

Contributions to the pension scheme are determined by the Fund's actuary on a triennial basis. The latest formal valuation of the Kent County Pension Fund was at 31 March 2016 and changes to contribution rates as a result of that valuation did take effect on 1 April 2017. The next valuation will be at 31 March 2019 and will take effect 1 April 2020.

21. **Financial Instruments**

The Code has significant disclosure requirements relating to Financial Instruments (e.g. loans and investments). They relate to the identification of the various types of Financial Instruments, gains and losses arising from

transactions during the year, comparative valuation statements, and the assessment of risks associated with holding Financial Instruments.

Detailed disclosure of the Council's holding of Financial Instruments is included in the note to the accounts.

21.1. Financial Liabilities

Financial liabilities are initially measured at fair value and carried at their amortised cost. Annual charges to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument.

The reconciliation of amounts charged to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement to the net charge required against the General Fund Balance is managed in the Movement in Reserves Statement by a transfer to or from Unusable Reserves (Financial Instruments Adjustment Account).

21.2. Financial Assets

Financial assets are classified into two types:

- loans and receivables – assets that have fixed or determinable payments, but are not quoted in an active market; and,
- Available-for-sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments.

21.3. Loans and Receivables

Loans and receivables are initially measured at fair value and carried at their amortised cost. Annual credits to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Council has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable, and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

Where assets are identified as impaired because of a likelihood arising from a past event and payments due under the contract will not be made, the asset is written down and a charge made to the relevant service (where specific) or to the Financing and Investment Income line of the Comprehensive Income and Expenditure Statement.

Any gains and losses that arise on the derecognition of the asset are credited/debited to the Financing and Investment Income line of the Comprehensive Income and Expenditure Statement.

21.4. Available-for-sale Assets

Available-for-sale assets are initially measured and carried at fair value. Where the asset has fixed or determinable payments, annual credits to the Financing and Investment Income line of the Comprehensive Income and Expenditure Statement for interest receivable are based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Where there are no fixed or determinable payments, income (e.g. dividends) is credited to the Comprehensive Income and Expenditure Statement when it becomes receivable by the Council. Assets are maintained in the Balance Sheet at fair value.

Values are based on the following principles and are given a 'fair value level' based on the accuracy of the valuation (Level 1 being the most reliable estimate):

- Level 1 – fair value is only derived from quoted prices in active markets for identical assets or liabilities
- Level 2 – fair value is calculated from inputs other than those quoted prices that are observable for the asset or liability
- Level 3 – fair value is determined using unobservable inputs, e.g. non-market data such as cash flow forecasts or estimated credit worthiness

Changes in fair value are balanced by an entry in the Financial Instrument Revaluation Reserve and the gain/loss is recognised in the Surplus or Deficit on Revaluation of Available-for-Sale Financial Assets line in the Comprehensive Income and Expenditure Statement. Subsequently, this entry is reversed in the Movement in Reserves Statement and debited/credited to the Financial Instrument Revaluation Reserve. The exception is where impairment losses have been incurred – these are debited to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement, along with any net gain/loss for the asset accumulated in the Financial Instrument Revaluation Reserve.

Where assets are identified as impaired because of a likelihood arising from a past event and payments due under the contract will not be made, the asset is written down and a charge made to the Financing and Investment Income line in the Comprehensive Income and Expenditure Statement.

Where fair value cannot be measured reliably, the instrument is carried at cost (less any impairment losses).

21.5. Financial Instrument Risk

The Code requires Authorities to estimate the "Fair Value" of their Financial Instruments and compare them with the carrying amounts which appear on the Balance Sheet. The Fair Value estimate will include the future discounted cash flows associated with the Council's Financial Instruments as at 31 March and should reflect prevailing interest rates as at that date.

The Code identifies the following three types of risk associated with Financial Instruments:

- (a) Credit risk
- (b) Liquidity risk
- (c) Market risk

The Code requires Authorities to produce a sensitivity analysis, detailing the impact of a 1% interest rate change. A full assessment of these risks, including the sensitivity analysis, is included in the note to the accounts.

These disclosure requirements are equally applicable to outstanding debtors, see note to the accounts for an analysis of debtors. In addition to this, a provision for bad debts is also included in the Statement.

Under IFRS 9 impairment allowance have to be calculated on the likely risk of default on financial assets over a 12 month and lifetime basis depending on the risk profile of the asset.

Where impairment allowances are deemed necessary then an appropriate charge is made to provision of services accordingly.

22. **Cash and Cash Equivalents**

Cash and cash equivalents include short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value and are shown on the Balance Sheet at their nominal value; these include investments that can be accessed immediately without incurring a penalty, such as call accounts. Cash and cash equivalents are shown net of any bank overdraft that form part of the Council's cash management.

23. **Private Finance Initiative (PFI)**

PFI contracts are agreements to receive services, where the responsibility for making available Property Plant and Equipment, needed to provide the services, passes to the PFI contractor. As the Council is deemed to control the services that are provided under its PFI schemes and as the ownership of the Property Plant and Equipment will pass to the Council at the end of the contract at no charge, the Council carries the Property Plant and Equipment used under the contract on the Balance Sheet.

The original recognition of these Property Plant and Equipment was balanced by the recognition of a liability for the amounts due to the scheme operator to pay for the assets net of any capital contributions made.

The stock is recognised at market value less the EUV-SH factor and additions are measured at cost as per the contractor model. Lifecycle costs are accounted for when they occur.

Property Plant and Equipment recognised on the Balance Sheet are revalued and depreciated in the same way as property, plant and equipment owned by the Council.

The amounts payable to the PFI operators will be analysed into the following elements:

- Fair value of the services received during the year;
- Finance charge – an interest charge on the balance sheet liability;
- Payment towards the liability.

24. **Group Accounts**

Group Accounts will be prepared in accordance with IFRS 10 (consolidated financial statements) and IFRS 12 (disclosure of interest in other entities), where it is considered that the Council has a material interest in subsidiaries.

Where applicable the following principles will be followed:

Basis of Consolidation

Group Accounts will be prepared on the basis of a full consolidation of the financial transactions and balances of the Council and a relevant subsidiary. Any gains and losses arising from a subsidiary will be fully reflected in the Comprehensive Income and Expenditure Statement, Balance Sheet, Movement in Reserves Statement and Cashflow Statement within the Group column.

Accounting Policies

Group Accounts will be prepared using consistent accounting policies where possible, where there are conflicting policies with IFRS requirements then the requirements of the Code of practice for Local Authority accounting will be adopted for consolidation purposes.

Where Intra-group charges occur they will be removed during consolidation of the accounts

Whether to group account is determined by Qualitative and Quantitative materiality, therefore when considering whether to group not only the values are relevant, the interest to all stakeholders is also taken into account.

25. **Exceptional Items and Prior Year Adjustments**

Exceptional items are included in the cost of the service to which they relate, or on the face of the Comprehensive Income and Expenditure Account if that degree of prominence is necessary in order to give a fair presentation of the accounts. An adequate description of each exceptional item is given within the notes to the accounts.

Prior year adjustments arise as a result of a change in accounting policies or to correct a material error. When either of the circumstances applies, the Council will show the extent of the adjustment in a table reconciling the adjusted opening and closing balances and/or comparative amounts shown for a prior period.

26. **Events after the Balance Sheet Date**

Where an event occurs after the Balance Sheet date, favourable or unfavourable, which provides evidence of conditions that existed at the Balance Sheet date, the amounts in the Statement of Accounts and any affected disclosures should be adjusted.

Where an event occurs after the Balance Sheet date and is indicative of conditions that arose after the Balance Sheet date the amounts recognised in the Statement of Accounts should not be adjusted but a disclosure made including:

- the nature of the event;
- an estimate of the financial effect.

Events after the Balance Sheet date should be reflected up to the date when the Statement of Accounts is authorised for issue as per the approved policies by the council.
